Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The indicated allowability of claim 27 is withdrawn in view of the newly discovered reference(s) to Ludwig et al. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Ludwig et al (6,513,942).
2. The recitation "a light source unit used in a backlight module, said backlight module being applicable to a scanner for scanning of a transparent document" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Art Unit: 2875

3. Ludwig discloses a first lamp tube (6), a first light guide plate used for uniformly guiding light of the first lamp tube (14-1), a second lamp tube (6-1), a second light guide plate used for uniformly guiding light of the second lamp tube (14-2), a reflecting plate (18) arranged between the first and second light guide plates and being reflective on opposing sides thereof to reflect output light from the first and second light guide plates, respectively (figs 4-6).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 28 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ludwig et al.

6. Ludwig et al discloses the claimed invention except for the recitation of a first and second diffuser arranged above the first and second light guide respectively. It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement a first and second diffuser arranged above the first and second light guide respectively in the device of Ludwig, since diffusers and their use in light guide displays are old and well known in the illumination art for the purpose of providing the light display with a means for modifying light output from a light guide in an evenly scattered manner to promote an even light emission from the display device. .

Allowable Subject Matter

7. Claims 1-7,11-24 are allowed.
8. The following is a statement of reasons for the indication of allowable subject matter: The reasons can be found in the previous office action.
